

DS500-QD

Quick Dissolve Dust Suppression Block

Designed for the mining industry, effective across all sectors

A highly concentrated, fast dissolving solid block used as an additive to water for the suppression of dust. DS500-QD breaks the water's surface tension making it penetrate and uniformly spread. The result is an increased amount of airborne dust being captured.

Dissolve Time:	20 minutes	Size^:	H188mm x D50mm
Usage*:	2 blocks per 1,000L of water	Weight^:	500g
Colour:	White	Carton Size:	15 (approx. 7.5kg)

Benefits

Reduce Production Costs

Improve Worker Safety

More Effective than Water Alone

Increase Productivity

Meet Regulatory Obligations

Biodegradable

Save Water

Remove IBC Problems

Australian Made

The quick dissolve formula makes DS500-QD the ideal choice for use in water trucks, tankers or sprinklers.

Directions for Use

DS500-QD can be applied using existing site water trucks, tankers or sprinklers, as well as injected into water supply lines.

1. Dissolve two blocks of DS500-QD per 1,000 litres of water.

- Individual packaging does not need to be removed as it is a soluble plastic that will dissolve in water.
- For increased efficiency, add DS500-QD before adding water – it will dissolve whilst water is being filled.

2. Allow approximately 20 minutes to fully dissolve.

3. Apply as per equipment instructions.

4. Recycle outer carton after use.

As the product is encapsulated in a soluble plastic packaging, the use of personal protective equipment (PPE) is generally not required. Consult the Safety Data Sheet (SDS) for further information.

*Increase quantity in low humidity or cooler temperatures as required, or if injecting into water supply lines.

^Manufacturing variances may result in a size and/or weight difference of approximately ten per cent.
